Project Title: Lazer Radio Broadcasting Facility
State Clearinghouse Number 2008041082
Project No.: P201000215

Re: Draft Environmental Impact Report

Dear Mr. White:

Yucaipa Valley Conservancy, under the direction of Mr. Francis O. Sissons, was originally formed in 1999 to specifically save the 850 acres (approx.) that is now Wildwood Canyon State Park (WCSP). WCSP is directly adjacent to and overlooked by the proposed Lazer FM Tower project and directly impacted. The site is readily visible from the majority of the WCSP hiking, mountain biking, and equestrian trails.

The Lazer FM Tower site breaks and disturbs the eastern boundary of the WCSP, causing habitat disturbance and destruction and breaking up the pristine and aesthetic eastern ridge of the entire WCSP, which is enjoyed daily by the many hikers, mountain bikers, equestrians, bird watchers, and general nature lovers.

Although the illegal demonstration pole that once existed was (falsely) utilized by Lazer Broadcasting to indicate a minimal disturbance of the area, Lazer failed to properly demonstrate the actual impact to the steep west facing slope by the FM tower, equipment building, parking area, fencing, and fuel modification clearing.

We object to the entire project at this location as it poses environmental hazards from plant and habitat destruction on a large portion of a steep slope. The project raises erosion and fire danger concerns that should not be waived and a major variance in a fire overlay area should not be approved. It also scars the very purpose of WCSP, which is to provide its many users escape from their urban life and vital reconnection with nature.

The City of Yucaipa, its citizens, and many, many visitors of WCSP have long objected to and opposed the Lazer FM Tower project next to our hard-won Wildwood Canyon State Park.
